About Facility Armor

Established in November of 2018, Facility Armor is a manufacturer and wholesale distributor of high-end specialty floor protection products, with the main focuses being custom entrance matting and gym floor protection. We offer custom products, but with simplified pricing structures, and quicker turn-around time than our competitors have on in-stock standard items. Our goal is to quickly become THE leader in the market through product innovation, unequaled service, and a commitment to providing our customers with the highest quality and highest value floor protection products in the industry.

Company Values

Facility Armor is an employee centered company. We believe that through open communication we can provide a rewarding, safe, and fun work environment with opportunities for growth. That belief is grounded in the simple guiding principle that well supported and inspired employees produce well supported and inspired customer relationships.

"We have used the flooring system a couple times already and those who have done the floor have commented how easy the set up and take down has been. The pieces that were sent were perfect and the rack system is doing its job. We are definitely happy with the product and the customer service you provided was amazing!"

Deanna Cayce

St Mary's Catholic School, Temple, TX

"Having recently moved into a brand new multimillion dollar facility, we were searching for a unique solution. We needed a way to protect our floors, have a safe walking surface for our student athletes, and appropriately highlight the tradition of our team walk to the field on game day. The Facility Armor staff matched our vision with the perfect product for our needs."

Gym Floor Covers

Whether your gym floor is made from beautiful maple, a high-tech synthetic, or anything in-between, they all share one thing in common, **they are large capital investments**. On average, a gym floor can cost upwards of **\$120,000!**

Daily traffic, equipment and chairs, and special events and graduations can all take their toll on the surface, reducing the playability of the floor while also drastically reducing the floor's lifespan.

Keeping them looking and performing their best can require a lot of **time** and **re\$ources**. Do you really need to make that a more expensive process? That is where we come in.

Facility Armor is dedicated to helping you protect your investment.

Facility Armor is serious about protecting the floors under our Specialty Floor Covers, but what's most important, is the people that walk on our Covers. For that reason, all of the Gym Floor Protection Products made by Facility Armor have built-in, **ANTI-MICROBIAL PROTECTION**. They help promote a cleaner and healthier environment.

Traditional vinyl floor covering is like a suit of armor- it's been around since the dark ages but it's cumbersome and heavy. You are no longer relegated to heavy vinyl tarp systems that keep the floor somewhat clean but don't **PROTECT** it from structural and performance defects. (For creatures of habit- turn to page 6...we make those as well).

Our Court Armor line of gym floor protection products is like Kevlar. It's the **NEW** tech, lightweight and quicker to deploy. Our products are specially designed to keep your floor looking its best no matter what is thrown at it.

Whether you are a small school with occasional events, or a large facility that hosts rock concerts, we have you covered.

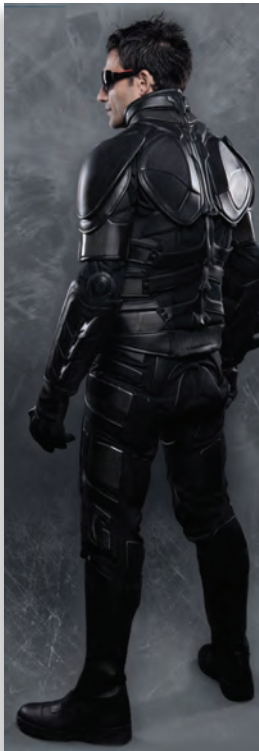

Each one of our products has a unique set of characteristics specifically tailored to solve the issues that you face in your facility.

We make products that are not only easy to use and deploy, but easy to live with, clean, and they protect your floors better than anything else in their respective categories.

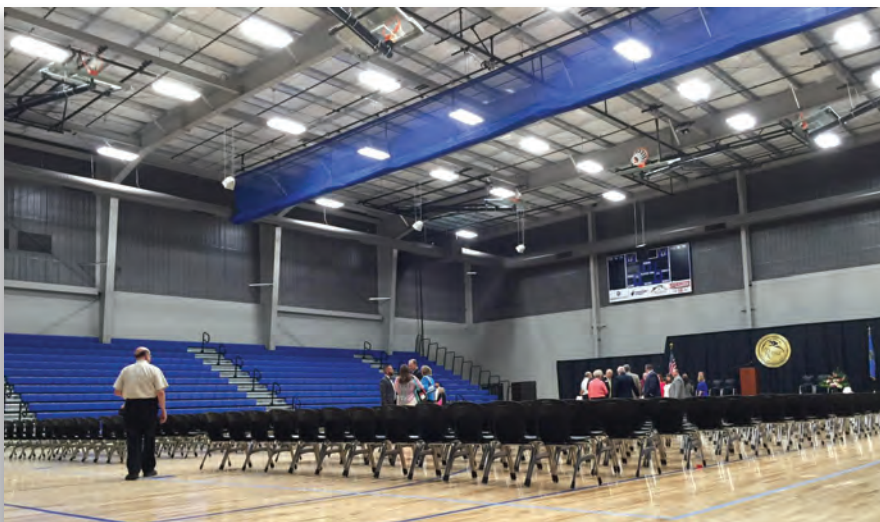

We make protecting your gym floor a "SLAM DUNK".

Old School

New School

Let us **Armor**
your floor.

For Protection

When extreme durability, performance, and deployment flexibility matters most, CourtArmor Tiles are the only choice to cover your gym floor. CourtArmor Tiles let you turn your gymnasium into a Concert Hall, Convention Center or other multi use venue without the worry of damage to your gym floor.

Custom Entrance Matting

If you don't have doors into and out of your facility, please skip this page. If you do, please keep reading!

DEFENSE - A critical part to any successful sports team. It is also a critical, yet often forgotten, part to a successful facility maintenance program.

Most facility maintenance programs are 99% **OFFENSIVE**. They include cleaning equipment, chemicals, mops and buckets, and most expensive of all...labor.

The problem with this approach is that it all revolves around trying to get dirt out of a facility once it has been let in. *Don't you think it would be better to keep the dirt out to begin with?*

90% of the dirt in a facility walks right through your entrance doors. **85%** of that dirt and debris can be stopped at the door with an effective matting program.

That is where we come in.

Facility Armor specializes in providing effective and beautiful matting solutions.

When it comes to matting, just checking the box can be an awfully expensive mistake. It leads to additional labor, premature wear on surfaces and carpet, potential slip and trip and fall issues, and a negative first impression.

The correct matting solution is a **24-7 DEFENSE** that works hard to help give you the most out of your time and efforts and *achieve the best cleaning results possible*. Let us help you create a defense that allows your offense to be more successful.

Putting the right solutions in the right areas will give you a better looking, cleaner, safer, and healthier facility.

It is time to get ARMORED.

Did you know?

The average cost of a trip and fall in the United States costs **\$50,000.00**. Yikes!

Facility Armor

Typical Heavy Duty Matting

Our custom matting solutions are made to solve your specific needs and challenges and provide you with the safest and most attractive facility possible.

You give us the dimensions (or we'll find a way to come and get them) and we produce the mats for you. Custom is usually considered a dirty word....*We do custom without the pain and suffering usually associated with custom.* **We are fast.** You don't have to wait long to start protecting your building. **Our pricing is straight forward.** You only pay for the material that you get. We don't charge custom cutting fees, custom this, and custom that. We can provide you with quotes in a matter of minutes (try us!).

Once you try a Facility Armor matting solution, you won't go to anyone else for your floor protection needs.

Things to look for in a matting solution:

- **Durability:**

- ✓ Average life of 7-10 years.
- ✓ Virtually Stain Proof
- ✓ Edging glued and sewn on

- **Cleanability:**

Here is a *dirty secret*... **Matting gets dirty!** It's supposed to! It sacrifices itself so the rest of your building looks good. Here is a question... Can you clean your current matting when it gets dirty? Dirty matting doesn't work well. There is matting out there that is hard to clean. It can be hard to vacuum, let alone extract. With all of our custom matting products, they can be vacuumed, carpet extracted in place, and even pressure washed outside (weather permitting).

If you live in the north, the winter is the toughest time of year to keep your facility clean. Ice Melt, Rock Salt, and Sand get tracked in and wreak havoc on your floors. Matting can help alleviate those white footprints that seem to go on for days. *What do you do when your mats are filled up with the ice melt, rock salt, and sand?* You aren't taking a mat outside in Fargo MN in January to rinse it out. So... if you can't extract your matting and you live where snow falls, you don't have a matting solution that is working well for you.

Don't live in the North? Not so fast... *What you don't see, can hurt you.* The sandy soil in the southwest and in the coastal regions decimates floors and floor finishes. Dirt and grit that blows across the plains, and the clays in the south, same thing. Matting is not just something you need when it rains or snows. Sand and grit looks like little razors under a micro-scope. *Do you know what those razors are doing to your carpet and hard floors?* Bottom line, if you have a building that has doors that allow people (and dirt) through them, you need matting. It will be the best investment you make in your facility maintenance program. As long as it is the right matting.

It will be the best investment you make in your facility maintenance program.

As long as it is the right matting.

Before

After

How much matting do I need?

At least 12-15 feet of high performance matting can contain 85% of the soil being tracked into a building - more is better.

FACILITY ARMOR

Dirt Adds Up...

See what can get tracked into your building!

- .02 ounces per person per day
- 250 days per year
- 5 ounces per person per year

People	100	500	1,000
Pounds of Dirt	31	156	312
Cost to Remove	\$15,500	\$78,000	\$156,000

Industry statistics show it costs over \$600 to remove just one pound of dirt from your facility! Vacuuming, mopping, dusting, scrubbing, stripping and refinishing floors, it all adds up. It's easy to say, "just use some matting to stop the dirt before it gets in your facility."

The problem is not all matting is up to the task. It doesn't trap soil, absorb moisture, or retain a level of appearance that is worthy of your facility. It's time to put Facility Armor matting to work for you - it's a high-performance system that can help maintain appearance levels, enhance safety, and lower your total cost of cleaning. Your Facility Armor Sales Consultant is here to walk you through it!

Custom Inlaid Logos

- Great Looks, Maximum Performance

Take your entrance to the next level and make a great first impression with our Facility Armor Inlaid logo matting program. Don't sacrifice function for style or visa versa. With Facility Armor, you get both. Our production method ensures that your logo will look great for years to come. Unlike printed logos that stain and wear off over time, our Facility Armor program utilizes solution dyed polypropylene which is hand inlaid into the base mat color of your choice and then reinforced with a vinyl patch for stability. Made to withstand the rigors of even the highest traffic entranceways, you can be confident that your Facility Armor inlaid logo mat is going to protect your floors while providing a great first impression.

- Unequaled style and functionality in one mat.

1/2" Vinyl-Nitrile Blend Wet/Dry Anti-Fatigue Matting

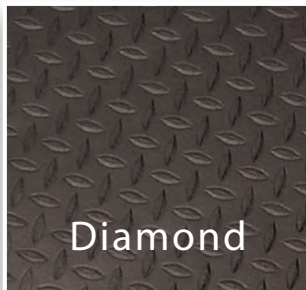

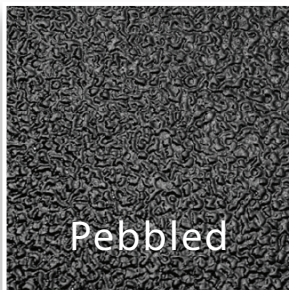

FatigueArmor Commander offers the ultimate in durability and comfort. The two-layer mat features an extremely durable vinyl-nitrile surface polymerically bonded to a resilient vinyl-nitrile foam cushion using an exclusive adhesive free UniBond® manufacturing process. Adding nitrile to the FatigueArmor Commander not only creates a more durable wear layer, but it also makes the surface slip-resistant in both wet and dry conditions.

Anti-Fatigue Matting

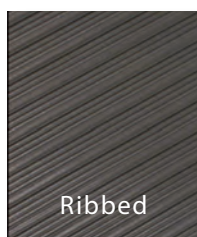

In conditions where lengthy periods of standing exist, worker discomfort and fatigue can impact productivity, absenteeism and health care costs negatively and needlessly. Facility Armor has a complete line of anti-fatigue matting products that provide comfort, safety and increased productivity in the workplace. Anti-fatigue matting is the most inexpensive yet beneficial method for preventing lower back and lower limb discomfort for your employees.

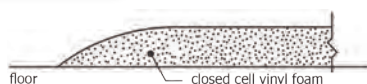

FatigueArmor Cadet combines the durability of vinyl foam cushion technology with three non-slip textures for safety in the workplace. FatigueArmor Cadet also features moisture and stain resistant properties that cut cleaning and maintenance time in half. Like many of our anti-fatigue matting products, FatigueArmor Cadet is manufactured with beveled edges for smooth transitions.

FACILITY ARMOR

KITCHEN ARMOR

Safety and Comfort go hand in hand in a productive work environment. KitchenArmor Matting was designed to deliver just that. They can be used in both wet and dry applications. The open holes allow liquids to effectively drain through, making it the perfect mat for kitchen areas, behind bars, food service stations, machine shops and more. Our highly grease and oil resistant nitrile rubber matting is easy to clean, fully launderable, and made to last. KitchenArmor Matting provides relief from long days on your feet, and peace of mind.

Additional Features

- Anti-microbial properties inhibit growth of bacteria
- High quality nitrile rubber construction
- Easy to clean and fully launderable
- Grease/oil resistant
- Long lasting and comfortable
- Meets ADA standards

Control Odors

The Janishield Mat is a fully disposable mat with built-in antimicrobial protection. In restrooms, urine can migrate into the floor and grout surfaces where it becomes the source of odor-causing bacteria. The Janishield Mat traps urine before it gets into the floor surface, eliminating the source of odor-causing bacteria.

For Safety

Janishield mats are designed to contain moisture when liquid is spilled on the floor and cannot be immediately removed, reducing the potential for slip/fall accidents.

Antimicrobial Protection Technology

The EPA registered technology incorporated into Janishield mats inhibits the growth of bacteria and fungi responsible for creating unpleasant smells and staining. By controlling unwanted microbes, this antimicrobial technology helps to keep products fresh, clean and odor-free.

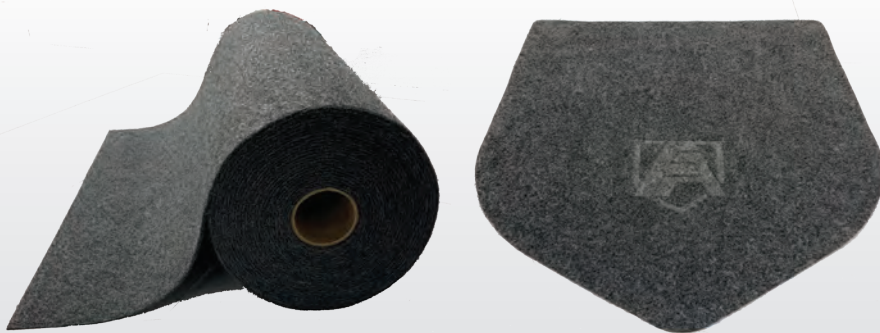

Additional Features

- Moisture Barrier Backing
- 100% recycled topcloth with antimicrobial protection
- Repositionable Adhesive Non-skid backing

Level of Protection
